

FOR IMMEDIATE RELEASE

RENÚ[®]:VOICE

Cytophil, Inc. is pleased to announce the exclusive distribution agreement with AmplioVox, LLC for Cytophil's ENT products for The United States, Canada, South America.

Cytophil launched **Renú[®] Gel** and **Renú[®] Voice** in the United States in 2015 after receiving FDA-clearance for Vocal Fold Insufficiency which is a condition often found in patients with voice and swallowing disorders.

Cytophil, provides physicians and patients with high-quality, safe, efficacious, and cost-effective tissue augmentation implants.

AmplioVox, LLC is a privately owned company specializing in innovative products for Laryngology treatments to improve quality of life. It's our mission to deliver vocal fold augmentation materials and instruments to providers around the world.

The vision is to advance the field of laryngology by providing innovative, physician-inspired solutions that empower clinicians and enhance patient care. Rooted in our deep expertise and collaboration, we are committed to be a trusted partner in delivering exceptional products and fostering the development of cutting-edge technologies—For Laryngology, By Laryngology™.

The company currently has the following range of laryngology products: **Renú[®] Voice**; a Calcium Hydroxylapatite (CaHA) injectable implant for long term vocal fold augmentation, **Renú[®] Gel**; a Carboxymethylcellulose injectable implant for short term vocal fold augmentation and a vocal fold injection needle for Microlaryngoscopy and Per-Oral injection.
